NAME:

Match It – Sources of Capital

In order to start a business money is needed. This money, or capital, can be obtained from a number of different sources, which are listed below. Unfortunately, the definitions have been mixed up. Can you match each source of start-up capital to the correct definition by drawing a line between the boxes?

Match each source of capital to the correct definition

Own Savings	Money from large numbers of people who each make a small contribution
Friends & Family	A gift or contribution often from government, that, if available, has to be applied for
Loans	Money invested in the business by the individuals who set it up
Crowdfunding	An investor who provides capital in return for part-ownership of a business
Small Business Grants	Money that is borrowed for a fixed time period at an agreed interest rate
Business Angel	Money invested, either lent or gifted, by people who are close to the owner
